

Since 1994 Equivalent DATA has served the legal industry by providing large-scale discovery services to attorneys, investigators, corporations, and legal professionals worldwide.

Software Built How You Think

NeedleFinder® is our proprietary end to end e-discovery software platform designed **to drastically reduce exposure and eliminate unnecessary delays**. The intuitive interface and integrated support tools enable even a non-technical user to quickly and easily uncover and review key documents.

“I love the interface; **it blows the competition away.**”

- Nick Eglevsky

Kelly Drye & Warren LLP

Its powerful analysis technology enables legal teams to **reduce costs and increase productivity** by culling documents to only the relevant dataset while protecting from inadvertent production of privileged information. Going beyond search, it provides a comprehensive assessment based on the facts contained within the metadata of the evidence to protect your client or organization.

Because it is one seamless platform, **documents reside in NeedleFinder throughout the life cycle of the case**. After analysis, the Send Documents to Review button gives the review team instant access to documents for further review.

needlefinder®

“What would have taken two weeks to review took **only one and a half days in NeedleFinder.**”

- Chris Bankler, Sayles Werbner

Professional Services

Data Collection

Our data collection and digital forensics professionals are experienced in a broad range of disciplines including incident response, information security, networking, databases, telecom, desktops, laptops, servers, virtualized environments, and smartphones.

Processing

Our e-discovery processing services preserve the integrity of both your data and your discovery process. NeedleFinder® maintains logs for auditing and defensibility, is Unicode compliant, can de-NIST and dedupe within or across custodians, supports foreign language processing, is compatible with Lotus Notes, and supports email in its native format.

Attorney Review

Our experienced attorneys and paralegals are trained in many review platforms. Our review centers in Houston and Dallas have dedicated space for your review needs; or we have can set up remote sites with workstations tailored to your specifications.

Hosting

Our fully redundant e-discovery datacenter provides secure and reliable hosting services, enabling effective collaboration of case information worldwide 24x7x365 through our secure web-based access.

Production

NeedleFinder® supports image and native file productions. Our technology and infrastructure enable us to manage large production projects with precision and quick turnaround. Review and produce responsive documents directly from NeedleFinder®, or export them for use in other review platforms.

Paper Discovery

Our experience in handling thousands of large, time-sensitive projects has made us a leader in paper-based document productions. Operating 24x7, we visually inspect every page for accuracy and never sacrifice the quality of our product.

We had to make a nearly impossible deadline for production under a court order, and **NeedleFinder made it possible."**

- Michael Frankel, Dechert

The Solution Center, **our fully-redundant datacenter** in Houston, Texas, has been recognized for its excellence in construction and was acknowledged as one of the first LEED® Silver certified green datacenters. Staffed 24 hours a day, seven days a week, it supplies the power, technology, and uptime needed to **securely process your data in a fraction of the time** it would take with traditional software or vendors.

Security

- Biometric authentication readers limit access to client data storage
- Separate fire suppression system designed for IT and datacenter
- Video surveillance by 44 high-resolution cameras recording 24x7x365
- Interior access rights governed by card key access control system

Technology

- Multiple Cisco Firewalls (256-byte encryption)
- 40 Gig Ether channels between switches
- Bandwidth provided by multiple Internet carriers
- 128-byte & 256-byte SSL Certificates
- Barracuda Networks' Spam Firewall
- Symantec End-Point Protection

Capacity

- Over 2 terabytes of data processed daily
- 5 million images/day
- 500+ file types

Power

- Full backup onsite by continuous feed of natural gas to generators
- LiebertUPS battery backup systems
- Liebertair humidity controls
- HVAC climate control
